WY draft RTC 9-6-13ATP.docx

Aaron--

The weekly resources summary is attached. I have also attached the draft RTC with additions by Andover Technology Partners, which includes some draft responses and indicates portions for EPA to address. We can plan to discuss the draft RTC at our regular Wednesday conference call. However, I will also be sending Jim Staudt an email indicating we must stop work after today because, as you and I discussed earlier today, we have reached the 200 hour initial limit EPA contracts authorized. We would continue work as soon as we can get approval or other authorization from EPA contracts.
